SUMMARY

Backend Developer with 1.8+ years of experience developing backend applications using **Java (17/21)**, **Spring Boot**, and **Relational Databases**. Experienced in building REST APIs, workflow-based systems, and high-volume data processing solutions. Proficient in **JUnit 5**, **Mockito**, and **SonarQube** for reliable, maintainable code. Improved processing performance by up to **50%** for workloads involving **500K+ records**.

TECHNICAL SKILLS

Languages & Frameworks: Java (17/21), Spring Boot, Spring Data JPA, Spring Security (OAuth2/JWT), SQL
Backend & Architecture: RESTful APIs, Modular Architecture, Design Patterns, Apache Kafka, PostgreSQL
Testing & Quality: JUnit 5, Mockito, SonarQube, Playwright
DevOps & Tools: Docker, Kubernetes, Maven, Git, Prometheus, Grafana

EXPERIENCE

- Avendum Technology (Airtel)** Gurgaon, Haryana
Software Developer Feb 2025 – Present
- Developed REST APIs for **Pan-India Airtel network management**, enabling users to plan, deploy, shift traffic, and dismantle network sites through defined lifecycle workflows.
 - Implemented workflow logic for **network deployment, traffic shifting, and dismantling**, handling business rules, status transitions, validations, and role-based actions across the asset lifecycle.
 - Built **bulk processing** features for large-scale network operations, using **Spring Batch** and multi-threading to process **500K+ records** while reducing manual effort for users.
 - Improved application reliability through centralized exception handling and structured logging with **SLF4J** and **Logback**, simplifying debugging and production issue tracking.
- Netlink Software Private Limited** Bhopal, MP
Java Developer Intern Sep 2024 – Dec 2024
- Developed a high-performance **Data Connector** using **Scala and Play Framework** to fetch unstructured data through non-blocking I/O, supporting **1,000+** concurrent requests in high-concurrency environments.
 - Processed unstructured datasets using **Apache Spark (RDDs/DataFrames)** and optimized persistence with **JDBC batch processing**, achieving **98% data consistency** and reducing latency by **35%** for daily workloads over **500K+ records**.
 - Collaborated in an **Agile/Scrum** environment to deliver **20+ RESTful endpoints** for JSON/XML communication and used **Docker** to package the **Data Connector** for UAT deployment and testing.

PROJECTS

- CloudNest (Live Demo)** | *Java 21, Spring Boot, MinIO S3, Kafka, OAuth2, Docker* Jul 2026 – Aug 2026
- Created a secure cloud storage engine using **Java 21** and **MinIO (S3 API)** to stream and store multi-format files including Excel, CSV, ZIP, and media files.
 - Implemented secure public file sharing using encrypted UUID tokens, enabling users to generate download links without requiring guest authentication.
 - Secured workspace endpoints with **OAuth2 SSO (Google/GitHub)**, **JWT tokens**, and email OTPs, while using **Kafka** for asynchronous task processing.
- NEXUS – 5G Network Audit Platform** | *Java, Spring Boot, REST APIs, Oracle DB* Feb 2025 – Present
- Developed a **5G network audit engine** integrating vendor APIs to validate network configurations and site readiness for **Airtel**.
 - Delivered a **Bulk Verification Engine** using concurrent API processing, reducing network plan validation time by **50%** for large-scale deployments.
 - Applied **design patterns** and modular architecture principles to decouple system components, improving code maintainability, scalability, and flexibility for future feature enhancements.

EDUCATION

- Sagar Institute of Science and Technology** Bhopal, MP
Bachelor of Technology in Computer Science (CGPA: 7.65/10) Aug 2021 – May 2025
- Saraswati Vidhya Mandir Hr. Sec. School** Bhopal, MP
Higher Secondary Education (MPBSE, 80.00%) Mar 2021
